

// STUDY COMPANION

Everything, in one place

Veda pulls the whole job of studying — asking, revising, planning, tracking, and staying well — into a single calm workspace.

Private by default

Journals and notes stay on your device. The global leaderboard is off until you switch it on. No ads, no selling data.

Free to run

Every AI feature uses your own free Google Gemini key, so there is no shared bill and no usage cap set by us.

// WHY STUDENTS STAY

Built to feel rewarding

Finish a task, nail the daily question, play a round — you earn gems. Gems unlock **Titles**: tiered status you build over a term.

Daily Challenge

One AI question a day. It gets harder as your gem count climbs, and a streak counter keeps you honest.

Leaderboard

Compare gems, streaks or games played with friends by friend-code — or check where you land globally.

Paste a free Gemini key →
everything unlocks

// AI STUDY TOOLS

Ask, revise, generate

The core is the **Homework Helper** — ask anything or photograph a worksheet, then choose how the answer is written: step-by-step, check-my-working, exam technique, ELI5, or “why am I wrong?”

- **Smart Study** — flashcards, quizzes, mark schemes, Cornell notes, mnemonics, predicted questions
- **Notes** — paste messy text, get a summary, mind map, essay plan, glossary or timeline
- **Exam Papers** — a custom mock built to your subject, question types and difficulty
- **Topic Library** — ready-made explainers by level, KS3 to university
- **Muse** — turn a description into an image; diagram style is built for revision

All AI features share one setup step: your Gemini key in Settings.

// WELLBEING & SOCIAL

Study life, not just study

Companion

An AI to talk to about stress, tiredness or feeling numb. If a message signals real distress, Veda alerts a guardian — **tells you first**, and always shows crisis resources. A safety net, not surveillance.

Journal

A private space, saved on your device. Type it or dictate a voice note. Export any time.

Forum

Ask, answer and share tips with other students, sorted by subject.

// ORGANISE & KEEP GOING

Plan it, track it

- **Study Planner** — a colour-coded weekly timetable; photograph your existing one and Veda imports it
- **Paper Tracker** — log every past paper and watch your average build per subject
- **To-Do List** — a plain task list that pays a gem per task done
- **Vault** — everything you save or create, with a 3-day recycle bin
- **Games** — nine built-in, revision that doesn't feel like it
- **Study Music** — Spotify playlists that keep playing across tabs

Make it yours

A customisable home dashboard and five themes — dark, Ivory, Hacker, Glass, Synthwave.
