

VEDA

The AI-Powered Study Companion

Homework help · AI companion · Games · Forum · Study tools — all in one place

veda-net.com

DIGITAL EXPO BOOTH

What is Veda?

Veda is a browser-based study companion built for students. It brings together an AI homework helper, a personal AI companion, journaling, a student forum, games, and full study-planning tools — all in a single dark, focused “tech systems panel” interface.

Every AI feature runs on a bring-your-own-key model — students paste in their own free Gemini API key, kept in their browser. No shared quota, no bot abuse, no server costs.

Tools & modules

9

Built-in games

1

Single-file web app

Learn & Organize

Everything a student needs to get through the actual schoolwork.

Ask Veda

AI homework helper for quick, guided answers.

Smart Study

Structured study sessions built around real content.

Notes

Fast note-taking, organised by subject.

Study Planner

Plans revision time across subjects.

To-Do List

Daily tasks and deadlines in one place.

Exam Papers

A library of past exam papers to practise with.

Paper Tracker

Tracks which papers you've attempted.

Connect & Engage

The social and game layer that keeps students coming back.

AI Companion

A conversational companion for daily check-ins.

Journal

Personal journaling, including voice notes.

Forum

A Firestore-backed space for students to help each other.

Leaderboard

Friendly competition to keep motivation up.

9 Built-in Games

Sudoku and more, for quick study breaks.

MAKE IT YOURS

Create & Personalize

Creative tools and a visual identity students can shape themselves.

Muse

An AI art tool for creative expression.

Vault

A private, secure space for personal files.

Playlist Manager

Spotify-based playlists for focus sessions.

Visual Themes

Dark navy default, plus ivory, hacker, glass & synthwave.

Safety First

Guardian Alerts

If the AI Companion chat detects signs of self-harm or serious distress, Veda notifies a guardian — automatically and transparently.

- The student is told first, before anyone else
- Real crisis resources are surfaced in the moment
- Designed to protect, never to surveil quietly

Why it matters

Study apps rarely think about student wellbeing. Veda treats it as a core feature, not an afterthought — built directly into the same chat students already use for homework.

How It's Built

Static & hosted free

A single-page app on GitHub Pages, live at veda-net.com.

Firebase backend

Firestore powers the Forum and student data; one Cloud Function sends guardian-alert emails.

Bring-your-own-key AI

Students use their own free Gemini API key, stored locally — no shared cost, no abuse.

Come find us

Try Veda live at the booth — ask it homework questions, explore the games, or just look around.
